

## Tire Supplemental

### Driving School Minimum Requirements

- Any individual tire can **not** be more than 6 years old (see how to determine age below). At the time of writing (2016) any tire that was produced in 2010 is valid.
- Each axle must consist of the same tire make and tire size (i.e, Toyo T1-R 225/40 R18). You can not have mixed tire makes/models or sizes across a given axle.
- Tires must be a DOT approved compound.
- H speed rated or higher. Minimum tread depth greater than 3/32" DOT approved.

### Tires Manufactured Since 2000

Since 2000, the week and year the tire was produced has been provided by the **last four digits** of the Tire Identification Number with the **2 digits** being used to identify the week immediately preceding the **2 digits** used to identify the year.

Example of a tire manufactured since 2000 with the current Tire Identification Number format:

In the example above:

**DOT U2LL LMLR 5107**

**51**

Manufactured during the **51<sup>st</sup>** week of the year

**07**

Manufactured during **2007**

While the entire Tire Identification Number is required to be branded onto one sidewall of every tire, current regulations also require that DOT and the first digits of the Tire Identification Number must also be branded onto the opposite sidewall. Therefore, it is possible to see a Tire Identification Number that appears incomplete and requires looking at the tire's other sidewall to find the entire Tire Identification Number
